

Safe life with BioKryo

BioKryo combines the most recent Fraunhofer-Cryostorage-Technology with more than ten years experience in cryopreservation and the shipment of cells, tissues, biomolecules, and DNA.

As a Biobank, BioKryo connects innovative standards for long term storage of biological samples with trend setting solutions and competent consultings as well as further services.

BioKryo possesses an authorization for the storage of therapeutic samples according to the German Law of Drugs (§ § 20c, 52a AMG). We are certified according to ISO 9001:2015 and have been accredited by the AABB in 2016.

Biobanking Services

- Storage of cryopreserved cell collections
- Storage of human cells and tissues according to §20c AMG and § 52a AMG (German Law of Drugs, Storage authorization holder)
- Sample management for clinical trials
- Storage of infectious cells up to biosafety level II (BioStV, GenTG)
- Optimization of preservation protocols
- Back-up of existing biobanks
- Global logistic services
- Consulting and support for design, setup and operation of cryobanks

Company

Storage & logistics of cryopreserved samples

Areas of activity

- Stem cells
- Advanced Therapy Medical Products (ATMPs)
- GMOs
- Drugs
- DNA & RNA & Protein Fluids
- Back-up-Storage of MCBs & WCBs
- Storage Temperatures at 4 °C, -20 °C, -80 °C, -150 °C, and -196 °C in LIN

Storage facility

1.000 m² storage place
GMP, BSL 2, S2-GenTG (GMO)
ISO 9001:2015
AABB accredited

Management

Dr. Vincent v. Walcke-Wulffen
Dr. Thomas Konrad
